

Seeking Sponsors for the Nevada Green Business Program

The **Nevada Green Business Network (NVGBN)** is a diverse, purpose-driven coalition that offers a statewide green business certification program. We work with small to medium-sized businesses, offer free assistance and resources, and recognize efforts that save energy and water, reduce waste, and prevent pollution.

Our checklists, built on environmental standards and best practices, offer businesses a framework for sustainability, and we certify those that meet or exceed the minimum threshold of green criteria.
